BACHELOR OF SCIENCE DEGREE IN PROJECT MANAGEMENT ONLINE

The online Bachelor of Science Degree in Project Management is designed to prepare graduates to become leaders in today's project-based business world by providing them with a comprehensive knowledge of organization and innovation management along with the skills necessary for effective decision making in a business environment that is diverse, global, and highly competitive. Course work balances business fundamentals with real-world project management principles, tools, and techniques. This bachelor of science degree program provides a combination of academic theory through general education courses, which prepare students for productive lives, community engagement, a diverse and rapidly changing world, and a lifetime of learning while the technical skills prepare for employment in today's business environment. Program objectives include: (1) developing human-relations skills that enable students to work effectively as group members and to organize and delegate tasks; (2) utilizing accounting-based skills; (3) utilizing computer applications with accuracy; (4) developing practices and policies required to meet short- and long-range organizational needs and opportunities; (5) developing project management, production management, and risk management skills; and (6) recognizing the importance of business ethics and social responsibility in business operations. Graduates of this program may find entry-level employment in such industries as construction, engineering, architecture, manufacturing, high tech, biotech, pharmaceutical, large corporations such as insurance companies and banks, and Internet companies, and may work in roles such as project managers, project coordinators, project planners, team managers, and operations managers. Upon completion of the program, a Bachelor of Science degree is awarded.
